

What is claimed is:

1. A method for simulating the trading of carbon dioxide equivalent emission reductions using an electronic trading application, comprising:

allowing a user to participate in an electronic trading simulation using the electronic trading application; and

allowing a simulation administrator to modify parameters in connection with the electronic trading simulation in real-time using the electronic trading application.

2. The method of claim 1 further comprising allowing the simulation administrator to log onto the electronic trading simulation.

3. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to modify a real-time timeline for the electronic trading simulation.

4. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to create a news announcement.

5. The method of claim 4 further comprising allowing the simulation administrator to release the news announcement to the user.

0096727.092801

6. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to release a news announcement.

7. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to modify parameters in connection with the electronic trading simulation.

8. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to modify parameters in connection with an organisation that is participating in the electronic trading simulation.

9. The method of claim 1 wherein the allowing the simulation administrator to modify the parameters comprises allowing the simulation administrator to modify parameters in connection with a country that is participating in the electronic trading simulation.

10. The method of claim 1 further comprising allowing the user to log onto the electronic trading simulation.

11. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to

0906722.092801

review information about the electronic trading simulation.

12. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to select an organisation to participate in the electronic trading simulation.

13. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to review the position of an organisation selected to participate in the electronic trading simulation.

14. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to generate credits in connection with an organisation selected to participate in the electronic trading simulation.

15. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to generate internal reductions in connection with an organisation selected to participate in the electronic trading simulation.

16. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to trade

09967272 099601

carbon dioxide equivalent emission reductions using the electronic trading application.

17. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to review a news announcement.

18. The method of claim 17 wherein the allowing the user to review the news announcement comprises allowing the user to review a late breaking news announcement.

19. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to review a timeline of sessions of the electronic trading simulation.

20. The method of claim 1 wherein the allowing the user to participate in the electronic trading simulation comprises allowing the user to review a report at the end of the electronic trading simulation.

21. A system for simulating the trading of carbon dioxide equivalent emission reductions using an electronic trading application, comprising:

user computer equipment configured to allow a user to participate in an electronic trading simulation using the electronic trading application; and

103250"2229650

administrator computer equipment
configured to allow a simulation administrator to
modify parameters in connection with the electronic
trading simulation in real-time using the electronic
trading application.
